## Emergency Solution Providers

### Survive-it Ltd

Established in 2006, Survive-it Ltd has become one of New Zealand's leading specialist providers of civil defence emergency solutions to deal with a wide range of natural and man-made hazards.

We are trusted suppliers of emergency preparedness services to businesses, industry associations, schools, cultural groups and government departments throughout New Zealand.

We have strategic alliances with other trusted industry leaders to provide complete emergency safety solutions, which ensure life safety and HSWA compliance.

We understand that for our customers in the Education sector, initial capital expenditure can be a barrier to providing a comprehensive safety solution, for staff, students and visitors. We also understand the requirements placed on Boards of Trustees by the recent changes to legislation such as the Health & Safety at Work Act (2015). We acknowledge the difficulty between balancing compliance requirements with the constraints of financing.

## Your Responsibilities – Health & Safety

The Health and Safety at Work Act 2015 imposes an active duty on those in a governance role to pro-actively manage workplace health and safety. The new laws also impose a due diligence role on officers and directors (Boards of Trustees) with regard to health and safety.

All of our services include supporting documentation to assist board members demonstrate due diligence for HSWA compliance.

It is important that Boards of Trustees are clear about the responsibility that rests with them under legislation.

There is independent information available to help you understand this:

- Staff Safety Training covering earthquakes, Tsunami and fire
- Active shooter and armed robbery best practice
- NZQA training packages
- HSNO Approved handler training
- First Aid refresher training with a reminder service
- Fire warden refresher training
- Health checks

## Options for Schools

In recognition of the difficulties that schools and kura may face in raising sufficient capital to implement a school-wide solution, we have recently introduced a lease option for schools wanting to install our civil defence

kits. This enables you to have high quality equipment and supplies available for a fixed monthly fee which can be incorporated into your operating expenditure, and paid from your Ops Grant. This can be reported by school management through to your board as part of your standard reporting and can also be used to highlight compliance during ERO visits. We believe this provides an excellent opportunity for schools to ensure that you are fully prepared to keep your school community safe should a sudden onset event occur.

Options include:

- Full range of Civil Defence Kits, Spill Kits & Containment, Fire Suppression Products available to lease
- Initial assessment to identify specific needs and make appropriate recommendations
- Staged roll out options focusing on higher risk areas initially.
- Building capability over a number of years.
- Service level agreements with easy monthly payments including regular maintenance

### Conclusion

We look forward to discussing your needs so that we can tailor solutions to meet your requirements and budgets. Please contact us for additional information, or visit our website to view our products and client testimonials.
